

## PATIENT (Peri/Post) MENOPAUSE QUESTIONNAIRE

Women experience different symptoms that indicate that they are going through the menopause. Listed are some of the most common symptoms. You may only be experiencing 1 or 2 and by taking a supplement, doing more exercise, drinking more water and watching what you eat, accessing support you may be able to keep them under control. If symptoms are troubling you quite a bit you may need to speak to your Doctor/Nurse. [\(It may be helpful to print out a copy of this questionnaire and take to your GP surgery to start off a conversation with Nurse/GP\)](#)

Please can you indicate if you have any of the following symptoms and how often they bother you. This information will be useful to give to your Doctor/Nurse to offer support/treatment. **(You may have other symptoms that are bothering you that are not on this list – remember to write these on here too)**

**PLEASE INDICATE HOW MUCH YOU ARE BOTHERED BY SYMPTOMS YOU ARE EXPERIENCING BY PLACING A TICK IN THE APPROPRIATE BOX.** If you are ticking 2 and 3 for some symptoms you may need to speak to your Doctor/Nurse )

SYMPTOM	NOT AT ALL	A LITTLE	QUITE A BIT	ALL OF THE TIME	COMMENTS
	0	1	2	3	
<b>Hot Flushes</b> – Your body feels hot and sweaty during the day or night.

<b>ARE YOU TAKING ANY SUPPLEMENTS/MEDICATION OR DOING EXERCISE FOR THE ABOVE SYMPTOMS?</b>					

Most of the symptoms described above are due to your body's oestrogen (hormone) decreasing. Knowing that the above symptoms are part of the menopause helps you to understand what is happening to your body and what you can do to help yourself and know when to consult your Doctor/Nurse for help and advice.
